Farmers' Co-operative Seed Company

111

Owned by Farmers

Cambridge, Illinois

In presenting this little leaflet a few words about the organization, its personnel, aims, and ideals, would be, we think, proper and helpful.

The Farmers' Co-Operative Seed Company was organized as an Illinois corporation by 180 farmers of Henry County in September, 1920, and is capitalized for \$25,000. Its sole aim and purpose is the handling, cleaning and selling, of pure and high grade domestic field seeds of known origin. During the summer of 1926 the Company built a modern three-story building equipped with the latest machinery for the handling of their business.

Its officers and directors are:

D. O. Hinman, Cambridge, President.

Perry Westerlund, Orion, Vice President.

W. D. Rishel, Cambridge, Treasurer.

Ed. Hulting, Geneseo, Secretary.

Benjamin Downs, Woodhull; A. B. Quaife, Annawan; C. D. Ford, Geneseo;

J. W. Morgan, Galva; T. C. McConnell, Woodhull; John Blair, Kewanee.

Seed Corn

There is probably no one thing that more vitally affects the prosperity of farmers of Henry and surrounding counties than seed corn. We carry in stock three varieties, Reid's Yellow Dent, Krug, and Golden King, which after many trials in check plots and in fields, have been found outstanding as to their high yielding qualities and adaptability to Western Illinois conditions.

Reid's Yellow Dent

Too well known by farmers of Illinois and Iowa to require much comment. Suffice to say our Reid's Yellow Dent was all grown from disease tested seed and is strictly a utility type. It has been grown here in Henry County for years. Our patent stock comes from such outstanding growers as Ed. Hulting, Geneseo; Henry Maeltzer, Osco.

Krug

Grown for years by Mr. Krug, a farmer of Woodford County, Illinois. Its high yielding qualities were discovered and brought before the public attention by Professor Moshier, of the University of Illinois, while employed as county farm adviser for Woodford County. Our patent stock is purchased each year from some of the growers and breeders of certified Krug corn. This parent seed is grown one year in Henry County to adapt it to Western Illinois conditions and the second year is released to our regular contract seed corn growers.

In test plots and field trials Krug corn is hard to beat, having a fashion of giving a good account of itself at husking time. This is evidenced by the repeat orders we receive each year from Eastern Nebraska and Central Iowa customers. Krug corn is recognized as an outstanding variety over the corn belt.

Golden King

(Early 100 Day)

For an early variety we have to offer you Golden King. This corn has for years been bred by W. L. Mills, McNabb, Illinois, grower and breeder of certified seed corn.

Our parent stock is purchased each year from Mr. Mills and is grown one year in Henry County to improve its adaptability, and the second year turned over to our contract growers.

Golden King, as its name denotes, is of a rich golden color, deep kernels, very free from starch, and highly disease-resisting, matures in 100 to 110 days.

Because of its high yielding, early maturing qualities, it is one of the outstanding early varieties grown in Henry County.

**View in our Modern Seed House, showing method of storing
and drying corn.**

Corn Grown From Tested Seed, Sack Picked and Properly Stored

Our corn is all grown from disease tested seed by some of the leading farmers of Henry County. It is sack picked and placed on racks in our new corn storage house, where the moisture content is reduced to 13 to 15 per cent after which just a little heat is maintained during the winter months to keep the temperature at around 36 to 40 degrees.

Test For Customers

The Company last year installed a germinator for the disease testing of corn with capacity of 100 bushels. Besides doing our own disease testing we are doing considerable for outside parties. If you desire having us do some disease testing for you, write or phone in stating number of bushels you wish to have tested, and space will be reserved for you. Our price for this work is two dollars per hundred ears.

Field Seeds

In the field seeds we carry a full line:

Mammoth Red Clover	Timothy
Medium Red Clover	Dwarf Essex Rape
Alsike	Sudan Grass
White Sweet Clover	Kentucky Blue Grass
Grundy County Sweet Clover	Orchard Grass
Yellow Sweet Clover	Spring Wheat
Alfalfa, Idaho	Barley
Alfalfa, South Dakota No. 12	Soy Beans, Mancho
Alfalfa, South Dakota Grimm	Soy Beans, Ebony
Inoculation Cultures for Legumes	

No Imported Seeds Sold

We have never handled imported seed because much of it will not produce satisfactorily in this country. Where possible we have obtained seed locally but where this is impossible we have bought the best adapted seed available. We have tried to follow the recommendations of the University of Illinois and the U. S. Department of Agriculture on these lines.

Agents Convenient For Customers

Our seeds are in stock and for sale at the following places of business in Henry and adjoining counties:

O. W. Hoit Implement Company, Geneseo, Illinois.
Johnson & Bollen, Geneseo, Illinois.
Ed. F. Zinser, Hooppole, Illinois.
Farmers Elevator & Grain Company, Annawan, Illinois.
Farmers Elevator & Grain Company, Kewanee, Illinois.
Sentz & Company, Princeville, Illinois.
Stark County Farm Bureau, Wyoming, Illinois.
J. H. Duncan, Toulon, Illinois.
Keel & Neville, Orion, Illinois.
Woodhull Grain Elevator Company, Woodhull, Illinois.
Ophiem Grain Company, Ophiem, Illinois.
Mercer County Farm Bureau, Aledo, Illinois.
Rock Island County Farm Bureau, Rock Island, Illinois.

We are never too busy to show visitors our seed house and are glad of an opportunity to do so. If however, you find it inconvenient to visit us personally a written order will receive our prompt and careful attention.
